An Introduction to Crystal Astrology

“As above, so below”

For millennia people have looked upward to the stars, interpreting patterns, cycles and symbols; and for as long, people have been looking below at birthstones and gemstones. Crystal Astrology unites and maps spiritual truth and guidance with the stars and the Crystal Elements. The power contained in our Crystal Elements enhances our native talents and attributes; it energises our life. “Crystal Astrology” is a completely new phrase in our spiritual vocabulary. It is a system whereby unique Crystal Elements are allocated to each degree of the zodiacal wheel – a unique energy assigned to each degree of the Zodiac, 360 different Crystal Elements.

Most people not only know their own star sign, they also know other people’s star signs and what those signs mean astrologically. Have you ever noticed how another person can have the same star sign as you but be significantly different in personality? Have you ever wondered why? Traditional astrology explains much of why we are so different in that all the planets need to be taken into consideration, not just our star sign. Aspects, placement, cusps, houses, and all that ‘technical jargon’ go a long way to explaining those details. However, many of us never really get round to fully understanding traditional astrology. With *Crystal Astrology* we use Crystal Elements to explore these differences and details, as most of us can relate energetically to crystals in a more obvious way than we do to traditional astrological, mathematical listings.

Crystal Astrology follows the lead of the New Age ideal that we are now within the ascension process, and that we have a greater capacity to understand and a greater desire to know than ever before. Heightened awareness and experience show that in this age we need more than 12 simple, broad, astrological or zodiac sign interpretations – we can actually understand and take in 360 of them, 360 being the number of degrees in a wheel or circle.

Early in the book, we discuss how to use crystals in astrology, what the information means, and how best you can utilise it. We will explore Traditional and

Modern Birthstone Lore; Crystal Astrology; Astrological Numerology; Sabian Symbols and the corresponding key words from the astrologer Dr. Marc Edmund Jones' book, *The Sabian Symbols in Astrology*; Healing Body Points as listed by astrologer Jane Ridder-Patrick in her book, *A Handbook to Medical Astrology*; Crystal Expression; Crystal Message; Sun Focus and Crystal Affirmation. Together we will rediscover who you really are, using relevant sections in this book to transform your Natal Astrology Chart into a Crystal Astrology Chart.

But first, with a minimum of fuss you can look up *your birthday* and find out *your solar Crystal Element* and *Crystal Message*. The crystal element associated with your birthday is known as your *solar* Crystal Element because the crystal energy is linked to the specific degree of the sun when you were born. Your solar Crystal Element promotes personal power, good fortune, karmic direction, and abilities. For example, if your birthday is the 22nd of March then your solar Crystal Element is Orange Aventurine, and the Crystal Message includes jovial and merry emotions, optimism, self-confidence and enthusiasm. Also, look to the Crystal Elements and Crystal Messages directly before and after your solar Crystal Element and take notice of them – they play a fundamental role in who you are and indicate which crystal energies are available to you. Use the Crystal Message given with your birth date in *Crystal Astrology* to crystallise your life. You can also visit www.crystalastrology.com to find out your Crystal Elements.

Crystal Astrology has been waiting on the sidelines for some years now, waiting for the 'new' rocks and crystals to surface and become available, such as Tanzanite, Avalonite, Aqua Aura and Lemurian Seed Crystals. I would like to add that it is by no means necessary to try and obtain your Crystal Elements in their physical form, and that a great deal of benefit can be obtained from looking at a picture or touching a stone in a natural environment or museum. Some of the elements are difficult to acquire and may require a treasure hunt on your part. As you read on, you may well find that several Crystal Elements resonate with you, and it is my firm belief that the best Crystal Element for you will come to you if you are meant to work with it. The focus in Crystal Astrology is a positive one – look to the energy in each of the 360 Crystal Elements to support you in your personal ascension process. My hope is that you look at various Crystal Elements to see and feel how each is important in your life, and then use them to energise yourself.

Traditional and Modern Birthstones

Your solar Crystal Element works in powerful harmony with your traditional birthstone. Birthstones are believed to support a positive life, protect from harm, bring good fortune, and aid healing. It is a long-held belief that our birth stone or gem is lucky, and that the power of the gemstone enhances our native talents and attributes, and energises our life. Crystals and other valuable mineral kingdom gifts are used as talismans, amulets and birthstones. Many cultures and religions hold crystals in high regard, utilising them in religious services, garments, crowns, sceptres, orbs, swords, and rings, as personal adornment and to signify and amplify spiritual power.

One of the surviving birthstone traditions is attributed to the Hoshen Breastplate, which was written about in the book of Exodus. Along with a great deal of energy and power, the Hoshen Breastplate contained one precious gem for each of the 12 tribes of Israel: ruby, topaz, aquamarine, turquoise, sapphire, emerald, jacinth, agate, amethyst, chrysolite, onyx and jasper. Each stone served as an expression of faith and optimism within the spiritual community.

There are a variety of birthstone charts linking gemstones with calendar months. All of the various charts differ with tradition, age and culture. The modern birthstone list most commonly referred to is from the American National Association of Jewellers, and was adopted in 1912. The Ayurvedic birthstone list is derived from Indian medicine and dates back to 1500 BC. Other birthstone lists also exist: traditional birthstone lists from various traditions and customs from the past 600 years; mystical birthstone lists of Tibetan origin that date back over a thousand years; and ancient birthstone lists also dating back over 1000 years for Arabic, Hebrew, Hindu and Roman belief systems. Planetary gemstone lists link particular crystals with planets, indicating that certain gemstones enhance the power of certain planetary influences in your life.

Zodiac Birthstones are linked with a zodiac sign instead of being associated with a calendar month. Zodiac Birthstone lists often cite up to five or more gemstones for each star sign and these lists vary. Table 1 is a cumulative list of modern, commonly-accepted zodiac birthstones.

Table 1. Zodiac Birthstones

| <i>Zodiac Sign</i> | <i>Dates</i> | <i>Birthstone</i> |
|--------------------|-------------------|---|
| Aries | Mar. 21 – Apr. 20 | Bloodstone, Diamond |
| Taurus | Apr. 21 – May 21 | Sapphire, Amber, Emerald, Azurite |
| Gemini | May 22 – Jun. 21 | Agate, Chrysoprase, Citrine, Moonstone, Pearl |
| Cancer | Jun. 22 – Jul. 22 | Emerald, Moonstone, Pearl, Ruby |
| Leo | Jul. 23 – Aug. 23 | Onyx, Carnelian, Sardonyx, Tourmaline |
| Virgo | Aug. 24 – Sep. 22 | Carnelian, Jade, Jasper, Sapphire |
| Libra | Sep. 23 – Oct. 23 | Peridot, Lapis Lazuli, Opal |
| Scorpio | Oct. 24 – Nov. 22 | Beryl, Apache Tear, Aquamarine, Topaz |
| Sagittarius | Nov. 23 – Dec. 21 | Topaz, Amethyst, Ruby, Sapphire, Turquoise |
| Capricorn | Dec. 22 – Jan. 20 | Ruby, Agate, Garnet, Black Onyx |
| Aquarius | Jan. 21 – Feb. 18 | Garnet, Amethyst, Moss Agate, Opal |
| Pisces | Feb. 19 – Mar. 20 | Amethyst, Aquamarine, Rock Crystal |

There is even a birthstone allocated for the day of the week on which you were born, known as your day stones: Monday is Pearl; Tuesday is Garnet; Wednesday is Cat's Eye; Thursday is Emerald; Friday is Topaz; Saturday is Sapphire; and Sunday is Ruby.

Interestingly, there are also planet-metal affinities, that have been known for eons, and were added to after the discovery of the outer planets (Table 2). These metal-planet affinities are used in alchemy, homeopathy, and astrology. In *Crystal Astrology*, metals are included in the list of Crystal Elements.

Table 2. Planet – Metal Affinities

| <i>Age</i> | <i>Planet</i> | <i>Metal</i> | <i>Zodiac Sign</i> |
|------------|---------------|--------------|--------------------|
| ANCIENT | Sun | Gold | Leo |
| | Moon | Silver | Cancer |
| | Mercury | Mercury | Gemini/Virgo |
| | Venus | Copper | Taurus/Libra |
| | Mars | Iron | Aries |
| | Jupiter | Tin | Sagittarius |
| | Saturn | Lead | Capricorn |
| MODERN | Uranus | Uranium | Aquarius |
| | Neptune | Neptunium | Pisces |
| | Pluto | Plutonium | Scorpio |

Just as a traditional birthstone vibrates to a Zodiac Sign, the same is true for metals. Work with metals in your life in the same way you work with Birthstones.

Traditional and modern birthstones systems, and the variations within them, work. These systems provide a strong tone, a strong crystal presence in our lives. These birthstones resonate with broad-scale aspects in our life such as love, health, prosperity and protection. Many people resonate with divine affinity to their chosen birthstone. Birthstone lore is valuable to us, and has been for thousands of years, and we should always honour these traditions and incorporate them into our life. *Crystal Astrology* expands on this concept and lists 360 Crystal Elements to provide a more detailed and personal Crystal Element. The Crystal Elements should be considered a ‘harmony’ to the underlying strengths of traditional birthstone systems.

Crystal Astrology

‘Crystallise your life’

How it works

- *Crystal Astrology* provides added insight into an individual astrology chart by allocating a Crystal Element to each and every degree in the astrological wheel.
- *Crystal Astrology* lets you look up your solar Crystal Element and helps redefine your natal astrology chart with crystal energy.

Crystal energy is unique energy, and everyone will vibrate uniquely to a given crystal type, and to varieties within a crystal type; no two stones are exactly the same to the sensitive crystal worker.

For each Crystal Element there is much traditional and modern information, but many writers concentrate this information to resonate with the chakra system or major aspects such as love, prosperity, healing or protection. Within *Crystal Astrology* I put forward a brief and distinctive analysis of each Crystal Element, presenting it in a simple and clear information sequence that resonates with the stone's attributes, but also assigns each stone an astrological point so that we can easily use them to learn and grow.

Let us start with traditional astrology, based on a circle and planet placement. There are 360 degrees in a circle, and therefore 360 degrees in an astrological wheel. We are all familiar with the 12 star signs of the zodiac, Aries through to Pisces; there are 12 segments in the circle, and with a little maths we calculate 30 degrees for each star sign of the zodiac.

- 360 degrees in a circle divided by 12 star signs = 30 degrees for each star sign
- One Crystal Element for each astrological degree
- 360 *DIFFERENT* Crystal Elements
- 30 *DIFFERENT* Crystal Elements for each star sign

So, for Aries there are 30 degrees of Aries and 30 Crystal Elements; 30 Crystal Elements for Taurus, and so on till we get to the end of the astrological wheel at Pisces.

Quick Crystal Astrology

Just by looking up your birthday, you can work out so much about yourself. For instance, if your birthday is April 2nd, simply look for your birthday in the book and you will see:

Birthdays: April 1st–April 3rd

Crystal Element: Sodalite

Sodalite is your Crystal Element Focus.

Born on February 9th, you will find:

Birthdays: February 7th–9th

Crystal Element: Schalenblende

Schalenblende is your Crystal Element Focus.

Your Focus is the Crystal Element that applies specifically to you.

Solar Crystal Element = Birthday Crystal Element = Focus

Reading through Crystal Astrology you may notice that your birth date does not link neatly to one Crystal Element. This is because there are 360 degrees in a circle, 360 Crystal Elements, but 365 days in a year, so your Crystal Element Focus depends on where you were born and at what time.

In the next section we will discuss how the Crystal Elements either side of your Focus are potent in Crystal Astrology, so even using the book as a quick reference guide will give you your significant Crystal Elements. But to accurately define which Crystal Element is your Focus, visit www.crystalastrology.com for your free, personalised Crystal Astrology report; or www.astro.com to obtain your free natal astrology report. You can, however, utilize this book without an astrological chart. More information about this is given in the Detailed Crystal Astrology section.

The Crystal Sequence

Karmic Condition

Focus

Quest

What tools do I have? How do I move forward? Where am I headed? These are the questions answered by the Crystal Sequence. As we have discussed, within Crystal Astrology you can look up your date of birth to obtain your Crystal Element Focus and its associated information. This crystal energy is the Focus of your abilities. But each degree holds so much potential, energy, description and consequence, you should always look to the Crystal Element directly before your Focus, known as your Karmic Condition, and the Crystal Element directly after, known as your Quest. The astrological information on either side of your Focus gives valuable insight into your astrology.

Karmic Condition is the mission you have set out on, and the tools you have available to you to succeed.

Focus is your strength and power source, your movement through life.

Quest sheds light onto the outcome and experience; it is the culmination of your efforts.

Example: Born on the 19th of August, your Crystal Element Focus is Rainbow Fluorite. Look to the Crystal Elements directly before and after the Crystal Element Focus to form your Crystal Sequence:

Karmic Condition

Desert Rose

Focus

Rainbow Fluorite

Quest

Citrine

You may be drawn to a significant Crystal Element in your Crystal Sequence and prefer to work with that crystal as a significant energy force in your life. In the body of the Crystal Astrology book you will find a significant amount of information: born on August 19th, there are three relevant sections, Leo 25, Leo 26 and Leo 27 (see below).

Karmic Condition

The astrological degree directly before the Focus degree is the Karmic Condition. The Karmic Condition provides valuable insight into what tools are available to

you and what strengths you have. The Karmic Condition may also indicate past life memories, early history or “baggage”, and it provides insight into the causes of certain traits and patterns. Leo 25 is the Karmic Condition for Leo 26.

Focus

For someone born on August 19th, Leo 26 is their sun Focus, the significant section that relates to this person's birthday. This section describes and lists the main symbols that this person should evaluate in their life. It offers the greatest gifts, and highlights subtle challenges. It provides a valuable summary of information pertaining to the individual's natal chart.

Quest

The Quest is the third part of the crystal sequence and is the astrological degree directly after the Focus, in this case Leo 27. The Quest offers insight into where you are headed, and information to assess purpose, possible outcomes and future potential.

Leo 26 is the degree at which your sun was sitting at the time of your birth. Leo 25 sheds extra light on your abilities and personality. Leo 27 helps you toward your future. This crystal sequence provides you with three potent Crystal Elements to exchange energy with, learn from, and work with. Choose the crystal from your crystal sequence that you are most attracted to, and honour the energy and support the other crystals have to offer you.

The brilliantly original concept of the sequence of Karmic Condition - Focus - Quest was defined by Lynda Hill, author and astrologer, and is regularly used as a tool in reading the Sabian Symbols. Kindly, Lynda Hill provided me with guidance and permission to transfer her Sabian Symbol Sequence definitions and methods to *Crystal Astrology*. Read more about Sabian Sequence in the Sabian Symbol section.

Detailed Crystal Astrology

Transforming your natal astrology chart into a Crystal Astrology chart

Fundamentally, *Crystal Astrology* substitutes a Crystal Element for a significant astrological degree in your natal chart. In the case of a birth chart, Western Astrology represents the positions of the planets and houses as seen from the place of birth at the time of birth. Western Astrology works in many other ways, including horary astrology, transits, progressions, solar arcs, secondary progressions. Since a crystal is allocated to a unique zodiacal degree, *Crystal Astrology* can be transferred to these other methods, but we will focus on Natal Charts – birth charts (Geocentric Tropical Zodiac Placidus Houses).

There are thousands of excellent Western Astrology books and courses to learn the fundamentals of Astrology; Crystal Astrology works within these guidelines by substituting a Crystal Element for each astrological degree – any astrology method can be transformed into a Crystal Astrology chart. However, briefly outlined here are some essentials of Astrology:

- Twelve star signs – Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces – indicate 12 broad personality energy types or drives.
- Planets, asteroids, nodes, etc., describe which energy is being expressed.
- Twelve houses, which are the segments in an astrology chart that direct us to where the energies of the planets and the energies of the star signs are active.

There are various methods, calculations and traditions involved in calculating an astrology chart. In Crystal Astrology, the Astrology Charts are calculated in the Geocentric longitude with Placidus houses, True Node system. Other methods include: Equal House, Whole Sign, Draconic, Koch, Regiomontanus, Porphyry, Topocentric, etc.

Your natal chart is a snapshot of where the planets, asteroids and more celestial bodies were at the time of your birth. Where your Sun was located in the sky defines your star sign. Astrological information is described in star sign, degrees and minutes notation. By going directly to www.crystalastrology.com you will be able to obtain your complete Crystal Astrology list.

Your Crystal Astrology listing becomes alive with crystal energy, colour and meaning. As with traditional astrology your SUN is your core, your solar centre, your powerhouse. The sun's significance in describing essentially who you are and how you are now becomes crystal clear. *Crystal Astrology* really deals with looking up your natal sun information. However, you can use this guide to completely transform your astrology chart into crystals. You can convert each planet's placement into crystal energy. Simply keep in mind the following guidelines:

The Moon – Emotions – Look to this Crystal Element to balance emotions.

Mercury – Communication – Look to this Crystal Element to enhance communication skills.

Venus – Love and relationships – Look to this Crystal Element to increase positive relationships.

Mars – Energy and motivation – Utilise this Crystal Element to move forward in life.

Jupiter – Career, luck and abundance – Look to this Crystal Element for success.

Saturn – Learning and experience – Choose this Crystal Element to help bring rewards.

Uranus – Unexpected gifts and talents – Utilise this Crystal Element to make the most out of every situation.

Neptune – Psychic and spiritual talents – Meditate on this Crystal Element energy to open new doors.

Pluto – Transformation – Look to this Crystal Element to guide you through rough times.

Chiron – Healing themes – Ask this Crystal Element to promote health and wellbeing.

North Node – Karmic Future – Talents we develop in this life.

South Node – Karmic History – Talents we bring into this life.

The North and South Nodes of the Moon are mathematically calculated points where the Moon's orbit intersects the plane of the ecliptic. The North and South Nodes are opposite each other; these two points act as signposts for our personal karmic journey. The most influential energies apart from your Sun are the North Node and South Node (North Node + South Node = LIFE PATH), and Jupiter. The Moon's Nodes and Jupiter are truly powerful when making life decisions.

Let us look at an example of a specific astrological natal chart:

So your birthday is the 2nd of April, 1974; your natal sun is then sitting at Aries 12 degrees 33 minutes – we round the minutes up to the whole degree

making Aries 13, and your Sun Crystal Element is Sodalite. You can change all of the longitude points into Crystal Elements, creating a Crystal Astrology chart.

Just to clarify, when transforming your astrological data into Crystal Astrology, round up the degree to the nearest whole number; from the above example: Moon Leo 11, Venus Aquarius 26, Mars Gemini 20, and so on. Always round up the minutes to the next whole degree regardless of the number of minutes, unlike in mathematics, because the zodiac starts at 00.00 degrees, and the Sabian Symbols start at 1.00 degree. So, to continue our example:

Natal Chart

Birthdate: April 2nd 1974, Time 3:30pm

Sydney NSW Australia 33S52 151E13 (Time: Zone AEST -10:00)

| Point | Longitude | Whole Degree | Crystal Element |
|------------|----------------------|----------------|-------------------|
| Sun | 12° Aries 05'57" | Aries 13 | Sodalite |
| Moon | 10° Leo 33'12" | Leo 11 | Tree Agate |
| Mercury | 16° Pisces 08 | Pisces 17 | Yellow Apatite |
| Venus | 25° Aquarius 42 | Aquarius 25 | Vanadium Beryl |
| Mars | 19° Gemini 18 | Gemini 20 | Green Kyanite |
| Saturn | 28° Gemini 48 | Gemini 29 | Hessonite |
| Uranus | 26° Libra 20 R | Libra 27 | Black Hypersthene |
| Neptune | 09° Sagittarius 30 R | Sagittarius 10 | Yellow Sapphire |
| Pluto | 05° Libra 17 R | Libra 6 | Lazulite |
| North Node | 22° Sagittarius 13 R | Sagittarius 23 | Blue Chalcedony |
| South Node | 22° Gemini 13 R | Gemini 23 | Green Quartz |
| Chiron | 19° Aries 51 | Aries 20 | Rhodochrosite |

R = Retrograde, which can be interpreted as the need for the support of this Crystal Element in your life.

You have the power to take, transform and understand each Crystal Element as it personally influences you. Your Crystal Astrology chart is an important guide to self-discovery. There are endless opportunities for interpretation and use of the Crystal Elements including relationship synastry, progressed charts, karmic strengths, soul's purpose, life path, past lives, and karmic contracts. Once you know your Crystal Elements, the associated information contained in each section will appear in your life in many ways. That knowledge will support you.

Information you will find in this book

There are 360 sections in this book, one for each astrological degree, divided into 12 sections that correspond to star signs. Crystal Astrology offers a modern tool to help us map our spiritual potential using a multi-disciplinary approach. Crystal Astrology provides information for an individual to use to transform and understand their unique talents in the moment, and as a guide to self-discovery. Let us look at an example of a section for a birthday on the 19th of February.

Pisces 1

Birthdays: February 18th-19th

Numerology: 331

Sabian Symbol: A public marketplace

Marc Edmund Jones Key Word: Commerce

Jane Ridder-Patrick Healing Body Point: Right calcaneum

Crystal Element: Silver (native)

Expression: Elemental silver is a naturally occurring metal. Silver promotes trust, excellence, balance, and the attraction and retention of wealth. It is an alchemical metal.

Message: Efficient allocation of resources enhances the positive flow of wealth.

Sun Focus: You value everyone and everything, seeing energy exchange as vital.

Affirmation: I am prosperous in my endeavours.

The following sections look at each subtitle in detail:

Astrological Degree

The Astrological Degree is essentially the title for each section and lists an astrological sign and a number, for example:

Pisces 1

Astrological Degrees are mathematical calculations labelling significant positions, of planets for example, when creating an astrology chart. The fundamental premise utilises the mathematical concept that a circle has 360 degrees. This subsection, then, indicates the astrological degree (rounded up to the full degree) and is unique for each section, starting with Aries 1 and listing the 360 degrees to Pisces 30.

Birthdates

The second subtitle in each section provides a range of birthdates, generated from reading an ephemeris. For example:

Birthdays: February 18th-19th

If your birthday falls within these dates this is one of your solar Crystal Elements, and it may be your *Focus* depending on the location and time of your birth (as discussed in the Detailed Astrology section).

You will notice in each section a couple of days are listed; this is because there are more than 360 days in a calendar year. Also, your place and time of birth influences the Astrological Degree of your Sun.

Astrological Numerology

Astrological Numerology lists the number of the corresponding Astrological Degree. For example:

Numerology: 331

Astrological Numerology therefore is a unique and sequential number between 1 and 360. Aries 1 has the Astrological Numerology of 1 and Pisces 30 has the Astrological Numerology of 360. Astrological Numerology is not the same as

name numerology however; name numerology is explained within this section for the benefit of those who are interested.

In *Crystal Astrology* an additional level is added to the traditional name reduced numerology base of 1–11. By looking at the sacred geometry of a circle and accepting that each number between 1 and 360 holds a specific energy pattern or energetic space, we can access potent information in the astrology chart and crystal energy. Astrological numerology increases our awareness, knowledge and understanding to 360.

Within *Crystal Astrology* the Astrological Numerology for Amethyst is placed in harmony with Sagittarius 30, Astrological Numerology number 270, Sagittarius 30 being the 270th degree in the Astrological Wheel. The Astrological Numerology of Amethyst is 270; Amethyst vibrates to the Sabian Symbol of the Pope blessing the faithful, and the key word is ‘sanctity’, therefore the number 270 holds the energy of ‘sanctity’.

Within *Crystal Astrology* the Astrological Numerology for Black Obsidian vibrates to the key word ‘realisation’, and the number 1. The last Crystal Element in *Crystal Astrology* vibrates to Astrological Number 360, the keyword is ‘discernment’, and Gneiss is the stone.

Astrological Numerology offers new, subtle numerology meanings that can be utilised with crystals and other important information such as names, addresses, repetitive number patterns, time, and astrology where numbers greater than 11 are generated. You can use *Crystal Astrology* as a numerology reference book: notice a number 182 – a street number, a registration number – and look it up; it is Moldavite energy and you will find valuable insight within section 182.

Name Numerology is very different to Astrological Numerology. In Name Numerology, crystal workers have attributed a single number significance to crystals and minerals based on each crystal’s name. Crystals have been numerologically assessed due to the name of a crystal in a given language. Crystal names were converted into numbers, and then reduced using a 1–11 system. Here we will look at Amethyst and detail its Name Numerology rather than its Astrological Numerology. Using a conversion table (Table 3) and the name, we work out a crystal’s name numerology:

Table 3. *The name numerology conversion table*

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| A | B | C | D | E | F | G | H | I |
| J | K | L | M | N | O | P | Q | R |
| S | T | U | V | W | X | Y | Z | |

A+M+E+T+H+Y+S+T

1+ 4+ 5+2+8+ 7+1+2 = 30

3+0 = 3

Amethyst has a reduced name numerology value of 3 (self expression) and, as discussed above, an Astrological Numerology of 270 (sanctity). The method of single number name numerology is powerful and it works; it is very useful in many circumstances. The energy of single number name numerology should never be underestimated. Keep in mind that name numerology is subject to change, depending on spellings and names in different languages. Astrological Numerology is determined by the Crystal Element, even if it is defined differently in various languages or cultures. Astrological Numerology provides a framework for advanced numerology. Astrological Numerology reinforces the uniqueness of each individual Crystal Element by associating the numbers 1 to 360 with Crystal Element definitions, and Sabian Symbol meanings, aiding in the individual ascension process.

Sabian Symbol

For each astrological degree, there is a Sabian Symbol. For example:

Sabian Symbol: A public marketplace

The Sabian Symbols were delivered into our reality by the astrologer Marc Edmund Jones, and clairvoyant Elsie Wheeler, in 1922. The Sabian symbols are a unique set of 360 descriptive, symbolic images, derived from an ancient

Mesopotamian source through a channelling session. Sabian Symbols are most commonly used as a guide in interpretative astrology and oracle divination. There is one Sabian Symbol for each of the 360 astrological degrees, therefore one for each Crystal Element, and therefore one for each astrological numerology section. The suggested reading list at the end of this section will lead you to uncover amazing Sabian Symbol truths.

Sabian Symbols shed light on who we are, where we belong, and how to succeed. Each Sabian Symbol is understood from the perspective of our own individual life experience, which allows us to access detailed information about our own expression in this world. Within our personal astrology chart, Sabian Symbols are our essence. Individualised interpretation is the beauty of the Sabian Symbols – you have the power to take, transform and understand each symbol as it personally influences you; you can choose to take it to the depths and heights of interpretation.

Let's try and explain what the symbols are, and how they work.

Let's light up some famous people's SUN Sabian Symbols, their Focus symbols, with some strong imagery and a brief interpretation. These people all harness this solar energy to help power them through life. See a new side to these famous people:

Bill Gates' SUN Sabian Symbol is Scorpio 6 'A gold rush'. Indeed Bill Gates has not only found gold, but has also helped many other people gain wealth by finding the gold mine in computers, and in his personal endeavours to assist those less fortunate than himself. Bill Gates donates billions of dollars to various charities.

Madonna's is Leo 23 'A yogi with transcendent powers yet untidy & unkempt'. Madonna rules her body, mind and spiritual self with extreme states of fitness and religious pursuits, as a yogi does. This is her key to success, tapping into the power of her SUN sign and letting it help her with her 'self' goals.

In the same way you place crystals, you can place and interpret Sabian Symbols in your natal astrology chart with each planet, as in Traditional Astrology. The Sabian Symbols provide the fundamental framework to link Crystal Elements to Astrological Degrees.

Key Word

This subsection lists the Key Word associated with the relevant Sabian Symbol, as defined by Dr Marc Edmund Jones and published in *The Sabian Symbols in Astrology*. The Key Words formulated by Dr Jones provide precious detail for the interpretation of the Sabian Symbols and Crystal Elements. There are 360 Key Words listed, each fundamentally defining an Astrological Degree with a specific essence. This is a unique key word, and energetically links the Astrological Numerology and the Crystal Element. An example for this section:

Marc Edmund Jones Key Word: Commerce

I was deeply honoured to be given permission by Aurora Press to utilise Dr Marc Edmund Jones' 360 Key Words from *The Sabian Symbols in Astrology: A Symbol Explained for Each Degree of the Zodiac* (Aurora Press. 1993),

Marc Edmund Jones' Key Words act as a signpost to show our strengths and talents; we can meditate on these words to see how they can help us attain a fulfilling life using the talents bestowed to us.

Healing Body Point

The Healing Body Point is one of 360 body parts as published by Jane Ridder-Patrick in *A Handbook of Medical Astrology*. An example for this section:

Jane Ridder-Patrick Healing Body Point: Right calcaneum

With the kind permission of Jane Ridder Patrick, I have included the body part that corresponds to each degree of the zodiac. The initial investigation into the 360 body parts was listed in the work of Elsbeth and Reinhold Ebertin, which appeared in “Anatomische Entsprechungen der Tierkreisgrade” [Anatomical Correspondences of the Zodiac Degrees] in 1949. Within Crystal Astrology I have used the body parts listed in Jane’s must-read book, *A Handbook of Medical Astrology* (2nd edition, revised & expanded).

The healing body points are 360 parts of the human body that correspond to each of the 360 degrees in the astrological wheel. When looking up your Natal Astrology, you may find the associated body points are either physically, emotionally or spiritually particularly strong or particularly weak. To have this detail is useful when working with past-life trauma, childhood trauma, and for future reference.

If you find you have strengths or weaknesses in the body parts that correspond to the sun and planets in your chart, you can work at balancing them on a physical and energetic level. For example, we can choose any significant astrological placement here – your Moon, Sun, Saturn – but I will choose the South Node as, in my experience, it often reflects a health issue. If your South Node is Virgo 21 degrees 33 minutes, you round up the degree to 22 degrees which gives you the following information:

Virgo 22

Birthdays: September 13th–15th

Numerology: 172

Sabian Symbol: A royal coat of arms

Marc Edmund Jones Key Word: Prerogative

Ridder-Patrick Healing Body Point: Gall-bladder

Crystal Element: Blue Sapphire

Indicators to consider when interpreting this information:

- energetic issues relating to your gall bladder in this life or past lives
- intolerance to certain foods, digestion problems
- solar plexus issues
- looking at the Sabian Symbol information a genetic predisposition to certain hereditary illnesses

Blue sapphire, therefore, is the Crystal Element to which to attune your healing frequency. Please keep in mind it is not always essential to have the Crystal Element on the physical plane; you can have a picture, or hold its energy in your mind's eye.

It appears that enlightened souls who came here to tidy up a lot of karma, learn many lessons and help others learn about spirit have most of the planet corresponding Healing Body Parts on the weaker side. I feel this is a part of the light-worker's path.

Crystal Element

In this section you will find a Crystal Element for each astrological degree. The interpretative information for each Crystal Element is found in the Expression, Message, Sun Focus and Affirmation sections that follow it. An example for this section:

Crystal Element: Silver

I have been working with crystals since 1991, and reading Sabian Symbols since 1993. I will often prescribe a crystal to help someone understand their Sabian Symbols, move through blocks in their life, and enhance their native abilities.

I realised a long time ago that crystal energy worked with astrology in a comprehensive way. I have incorporated various elements that include minerals, gems, metals, elements from the periodic table, rocks and stones – gifts of the

mineral kingdom that can be acquired with thoughtful environmental awareness, gifts now known as the Crystal Elements. The word 'crystal' – as defined in most if not all New Age books including those written by Gienger, Hall and Melody – embraces natural crystals, rocks, stones, shells, opals, amber, minerals, periodic table elements, gemstones, metals, synthetic (man-made) or enhanced crystals, gemstones, and refined metals. Please note: dangerous and environmentally sensitive mineral kingdom gifts such as uranium, arsenic, coral and ivory are not included in the list.

It became obvious to me which Crystal Element went with which degree of the zodiac through studying the Sabian Symbols.

Allocating the best Crystal Element to each of the astrological degrees was the most important aspect of this work. I realised that the Crystal Element would have to harmonise with the already established system of Sabian Symbol Astrology. In a mutually supportive way then, the Sabian Symbols and Crystal Elements work together. Some obvious examples of corresponding Sabian Symbols and Crystal Elements that initiated this study include:

| | |
|------------------|---|
| Aries 9 | Sabian Symbol: A crystal gazer Crystal Element: Quartz Crystal |
| Taurus 30 | Sabian Symbol: A peacock parading on a lawn Crystal Element: Peacock Ore |
| Scorpio 6 | Sabian Symbol: A gold rush Crystal Element: Gold in Quartz |

Another example of how this process worked for the other not-so-obvious Sabian Symbols is included for Cancer 22:

Cancer 22
Birthdays: July 13th–15th
Numerology: 112
Sabian Symbol: A woman awaiting a sailboat
Marc Edmund Jones Key Word: Equanimity
Jane Ridder-Patrick Healing Body Point: Gastric mucosa

Crystal Element: Avalonite

Expression: Avalonite is a trademark name for a natural, coral-peach zoisite. Avalonite supports freedom and unconditional love, and promotes earth healing.

Why Avalonite is linked with Cancer 22:

- The Sabian symbol for Cancer 22 is (on many levels) interpreted as a woman awaiting a sailboat. On a higher level we can interpret this as a lady of Avalon waiting for the boat to cross.
- Avalonite resonates woman, female energy, water, goddess. Avalon has a strong tone of love and wisdom.
- A wonderfully attractive stone, ripples of energy cross the surface and penetrate deeper and deeper into emotion and spirit.
- 22 is a Master Number – the energy of Avalonite is equivalent to a high energy number vibration.
- The people who have this astrological degree significantly in their chart have a fear of being loved, or have been hurt by a partner and feel they have been kept from fulfilling their destiny in some way because of that relationship; Avalonite heals this pain.

I discussed the above rationale with Kellie the Crystal Deva who was blessed to have discovered and named this Crystal Element – she agreed that Cancer 22 captures the essence of Avalonite.

Expression

The Expression section contains first a geological description, and second a metaphysical description of each Crystal Element. An example for this section:

Expression: Elemental silver is a naturally occurring metal. Silver promotes trust, excellence, balance, and the attraction and retention of wealth. It is an alchemical metal.

The Expression has a two-fold role. First, the Expression provides a simple geological description of the Crystal Element. The technical information is given

for those who may be interested in the chemistry of the mineral, its formation, or use. A metaphysical description of the Crystal Element is then provided; this description is an extension of crystal descriptions provided by other authors, and specifically resonates with each Sabian Symbol, and in turn each Key Word and a unique Astrological Degree. The distinctive information contained within *Crystal Astrology* distinguishes one Crystal Element's attributes from another's.

The Expression section is succinctly written specifically to allow space for individual crystal energy experiences. I suggest you handle various crystals and read a variety of crystal literature, such as in the suggested reading list, to deepen your appreciation of crystal energy. Further study of crystals will bring you to a greater understanding, particularly in regards to how they resonate with the chakra system, how crystals work, and how to work with them.

By meditating on a certain crystal energy, you can help manifest, protect and energise your life. The wearing of crystals energises, and potentially promotes healing for your body, mind and spirit.

Message

The Crystal Element energy, and in most cases the linking Sabian Symbol image, often has extra information to impart in addition to the metaphysical properties. This extra information, which can be found in the "Message" subsection, clarifies the energy of the astrological degree and, of course, provides details on the energy of each specific Crystal Element. For example:

Message: Efficient allocation of resources enhances the positive flow of wealth.

The Message summary is not only useful in defining an astrological degree or Crystal Element energy, but also acts as a signpost for individuals to utilise in normal crystal work. The Message will help spiritually confirm life path choices, indicate skills needed in decision making, and illuminate the healing properties of Crystal Elements even if they are not in your personal astrology chart. When you are drawn to a particular crystal in your daily life, you can use Crystal Astrology as a quick reference guide to gain more insight into the energy of the crystal.

Crystal Elements can be used to enhance a specific symbol in your life, maybe angel energy, business skills, dexterity, romantic or unconditional love. You can meditate on or acquire the Crystal Element that corresponds to a favourable Sabian Symbol image, thereby drawing that energy into your life. For example, to invite Angelic Energy you could work with Euclase or Angelite.

Sun Focus

The Sun Focus is a positive and brief personality description if this astrological degree is your natal sun degree. For example:

Sun Focus: You value everyone and everything, seeing energy exchange as vital.

A star sign (30 degrees of the Astrology Wheel) provides a broad, sweeping description of native traits. The Sun Focus gives one particular aspect of your personality, providing a spiritual mirror to your higher self, opening the doors to a new, bright self-image.

The Sun Focus is our essence. The corresponding crystal energy helps us meditate on ourselves, our purpose and our life, with support and love. My hope is that you can use your Sun Focus as an important guide to self-discovery. When you see aspects from your Sun Focus in your life, they are like signposts along your life's path, showing you the way.

It is true that some people are more sensitive and attuned to crystal energies; if in doubt about your Focus Crystal Element consult a crystal worker. Keep in mind that with practice and exposure to crystals your skills will grow – your intuition and personal crystal interconnectivity will crystallise. You may feel drawn to tumbled stones, native crystals, cut stones, carved stones, naturally worn, or

collective Crystal Elements. Use your intuition to assess which crystal forms you prefer and through them endeavour to learn more about yourself. Using your own in-built guidance system and universal energy patterns, you will come to accept and appreciate your unique talents and gifts, using both the information in this book and traditional astrology.

Affirmation

An affirmation is a tool to help connect us with the Crystal Element energy, for example:

Affirmation: I am prosperous in my endeavours.

The affirmations listed can be utilised in meditation, manifesting, earth healing, protection, acceptance and surrender. You can use the affirmation with or without its corresponding Crystal Element in a physical form; often a picture, a card, a thought can raise your energy to a Crystal Element's vibration.

Positive affirmations can change our lives; there is great power in prayer and positive thought. You may like to add to or change certain affirmations in this book; in particular you may like to add your name into an affirmation to make it more personal. Repetition is very important with affirmations: repeat the chosen affirmation often, in words, thought, writing, singing and art. Use the Crystal Element and/or Sabian Symbol image to help you visualise the positive intention.

When you are drawn to a certain crystal in the book, in nature, in a shop, or elsewhere, have a quick look at the associated affirmation and see how well it fits with what you really need to bring into your life.

How to use Crystal Astrology

Crystal Astrology Applications

Colour Therapy

You may notice a particular colour or theme recurs in your Crystal Astrology. Many of your Crystal Elements may be white, pink or green. Many of your Crystal Elements may be metallic indicating a refined chart, alchemically powerful. Other patterns may emerge; for instance, you may have a significant number of one type of rock, indicating strengths in your chart:

- Igneous rocks indicate power and clarity
- Sedimentary rocks indicate empathy and kindness
- Metamorphic rocks indicate complexity and durability

You can work with the dominant colour scheme in your Crystal Astrology Chart in the same way you can work with colour therapy in aura integration and chakra balancing. Here is a brief summary of the meaning of colours:

Table 4. Colour Interpretation Information

| <i>Colour</i> | <i>Chakra</i> | <i>Key Words</i> |
|---------------|---------------|------------------------------|
| Red | Root | Energy and passion |
| Orange | Sacrum | Joy and creativity |
| Yellow | Solar Plexus | Personal power, intelligence |
| Green | Heart | Prosperity, harmony |
| Blue | Throat | Communication |
| Indigo | Third Eye | Intuition |
| Violet | Crown | Divine |
| White | | Purity, wisdom |
| Black | | Power, force |
| Coral/Peach | | Love, harmony |
| Gold | | Alchemy |

| <i>Colour</i> | <i>Chakra</i> | <i>Key Words</i> |
|---------------|---------------|------------------|
| Silver | | Mirror, grace |
| Pink | | Gentleness, love |
| Turquoise | | Communication |

You might like to place a tick next to the colours you have already identified in your Crystal Astrology to see if one colour is more significant than the others.

Many crystals including sapphires, diamonds, agate and carnelian may be colour enhanced to improve their colour and appeal. My personal experience is that colour enhancement to various crystals does not alter their innate properties, though it undoubtedly makes that mineral more appealing to some people. Colour enhancement boosts a crystal's potency in colour therapy, aura integration and chakra balancing in some people, and not in others.

Be completely aware of the Crystal Elements you own or purchase – find out if the Crystal Element is completely natural, enhanced in some way, or man-made. It is up to you to see how Crystal Elements work in your life. I know some crystal workers who only work with natural crystals and others who work with success using with a wide variety of enhanced, man-made, natural, and/or polished Crystal Elements.

Creating jewellery may be a unique and energising way to realise your crystal astrology. For thousands of years people have adorned themselves with beautiful Crystal Elements, and this continues today.

There are those significant times in life when a gift of a special piece of jewellery makes an enormous difference; for instance, during child birth a birthing bracelet or necklace might be given, or in times of stress or grief a simple heartfelt gift of jewellery can change a person's stamina, endurance and outlook. Crystallise your lives, and help others crystallise their life too.

Oracle

There are many uses for the *Crystal Astrology* book apart from astrological applications. The Crystal Elements are a modern tool for divining fortune, and the insights are truly astounding. By using *Crystal Astrology* as an Oracle you have the power in your own hands – you will receive crystal clear information, and it will be up to you to accept or reject the advice given.

Here are a few ways you can use *Crystal Astrology* as an oracle:

- Choose a number between 1 and 360 (using any method) and use *Crystal Astrology* as a look-up guide.
- Make your own Crystal Element List, cutting out each element to make 360 'cards' to choose from at random.
- If you have access to astrology software and a good knowledge of astrology, you can cast an Astrology chart for the moment (Horary) and interpret the details using *Crystal Astrology*.

Another way to use this book as an oracle is that when you see a sign, a house number, a large coloured pebble on the beach, a picture, hear a certain song playing everywhere you go – something that grabs your attention, something that keeps repeating in you life – use Crystal Astrology as a means to look-up and interpret the sign the universe is providing. Use this book as a reference guide. Use the various sections as a reference or index, looking up the Astrological Numerology for number signs, Crystal Elements for crystal signs, Sabian Symbols for words and images, and Healing Body Points for areas on the body.

If you have a question that needs answering or illuminating, the 360 Crystal Elements can provide insight and clear interpretations. Here's an example:

Question: What would people reading this book most like to know?

Method of choosing the outcome: randomly opening the book and pointing to a passage, in this case Number 71.

Gemini 11

Numerology: 71

Sabian Symbol: Newly opened lands offer the pioneer new opportunities

Marc Edmund Jones Key Word: Identification

Crystal Element: Tsavorite

Expression: Tsavorite is a green garnet, rich in vanadium and chromium. Traditionally, Tsavorite is a source of illumination for physical and spiritual growth.

Message: A fresh start, new beginnings, nourishing all stages of spiritual evolution.

Affirmation: I see great opportunities born from simplicity.

I would interpret the answer to be: The thing that people reading this book would most like to know is that it is an original source of illumination and growth.

The Crystal Children

The Crystal Children are a group of people, the majority of them born after 1996, whose auras are opalescent, pinky blue; they come here already talking about past lives, energy fields, chakras, stars, crystals and rocks, and are very concerned with love, peace and healing. This crystal nature starts to show itself explicitly as early as in the womb. Looking at a Crystal Child's birth chart using Crystal Astrology can provide insight into their exceptional traits.

I see a striking group feature for the period of time that most Crystal Children chose to be born, and that is a strong presence of Aquarius in their chart, particularly Uranus and Neptune in Aquarius. Keeping in mind that Uranus indicates advanced ideas, scientific discovery and the unexpected, and Neptune indicates specific psychic and spiritual abilities, both giant planets are bringing in and focusing Aquarius energy in these children. Many Crystal Children born in this period of time will also have an Aquarius Sun; an Aquarius moon; Aquarius Rising; Mercury, Venus, and/or Mars in their chart, all increasing the Aquarian influence in their lives.

You can look at the 30 Sabian Symbols and Crystal Elements for Aquarius within this book to see the trend that predicted this wave of children, and to help us as parents, family, friends and teachers of these children to understand some of their uniqueness.

The Key Words for these symbols include: Therapy, Courtesy, Progression, Affirmation, Accomplishment, Probity, Analysis, Concern, Approbation, Conviction, Clearance, Refinement, Aptitude, Serenity, Uniqueness, Efficiency, Tradition, Immediacy, Emanation, Continuity, Dramatization, Defiance, Durability, Ecstasy, Essentiality, Subtlety, Impact and Indication. These are all Aquarian traits, with specific Sabian Images to assist with each subtle expression of a Crystal Child's astrology and gifts.

The main parts of the body that correspond to these Sabian Symbols include the renal system, kidneys, bladder, right fibula, vascular system of skin, left calf muscle, left cruciate ligaments, and the spinal nervous system. This list may give insight to generational health strengths and challenges, and can be used in energetic healings.

Do you have a Crystal Person in your life that radiates the Sabian Symbol of a Hindu healer (Aquarius 4) or a Large White Dove bearing a message (Aquarius 20)? Whichever Sabian Symbols and Crystal Elements your Crystal Children chose when they were born are perfectly suited to them, and to the times in which they chose to incarnate.

Summary

Crystal Astrology helps us use crystal energy to access our own inner wisdom through details, images, feelings, colour, as well as crystal vibrations. We walk the pathway of deeper understanding by looking to all knowledge available to us, thereby gaining higher awareness and strengthening our connection with the universal consciousness.

Take time working with your Crystal Elements; realise the unique and beautiful energy that is in each and every Crystal Element. With eternal perspective both the diamond and the river pebble have magical potential. Meditate on your Crystal Elements; see how they appear in your life; look for them in your surroundings; search for more detail about your personal Crystal Elements, seeking crystal lore from other sources as well, and integrate the knowledge gleaned from your discoveries into your life. Always remember that crystal energy and universal energy are interconnected – use your crystal connections wisely, with love and compassion, in all ways, for the good of all.

You surely know your personal zodiac sign, which is based upon the position of the sun at your birth. But did you know that each of these signs is composed of 30 different degrees, each representing a different energy or unique character? *The Complete Guide to Crystal Astrology* assigns a crystal element to each of the 360 degrees of the zodiac. This is the base for a very individual association between crystals and the stars at your birth.

Look up which of the 360 crystal elements can be associated with the position of the sun on your birthday! Translate your whole birth chart into crystals by looking up which crystal elements are associated with the different planetary positions at the time of your birth! Find out how your personal crystal elements are connected to numerology, Marc Edmund Jones key words, Sabian Symbols, and Jane Ridder-Patrick healing body points.

Discover crystal messages about your life path, your hidden and not-so-hidden abilities.

The potential you are given at birth is often much more than you'd expect!
